Summary

Systems administrator and escalation lead with hands-on Windows Server, Active Directory, Microsoft 365 and Azure experience. Led NOC operations and recovery verification at Front Range Internet and modernized client servers, access and networks through Technomancy IT.

Skills

- Windows Server, Active Directory and DNS
- Microsoft 365, Azure and Microsoft Entra ID
- VMware ESXi, Hyper-V and backup restore verification
- VLANs, firewalls, VPNs and connectivity troubleshooting
- PowerShell, incident escalation and runbooks

Professional Experience

Founder / Product Engineer / Systems Lead

Technomancy IT LLC

Present

- Modernized client servers, endpoints and network equipment; provided direct IT support and took on-call escalations.
- Helped bring a satellite office online with VPN connectivity, Windows Server and Active Directory access.
- Implemented tenant-aware identity and access integrations, including Microsoft Entra ID.

Senior Systems Engineer / Datacenter Architect

Front Range Internet Inc.

2015 - 2020

- Led NOC operations and took escalations that went beyond first-line support. Built diagnostic tooling for staff and hosting and colocation customers.
- Migrated workloads from Hyper-V and VMware ESXi to Docker and Kubernetes and carried out targeted server and firewall upgrades.
- Led recovery verification and ran SOC 1 and SOC 2 audits, turning operating procedures and controls into evidence the auditors could review.

Systems / Software Engineer

Office Evolution

2014 - 2015

- Automated firewall and router configuration with Node.js as part of location and customer onboarding.
- Built a system around a Linux router that mapped individual Wi-Fi accounts to each office’s VLAN and supported per-office bandwidth and access controls.

Network & Systems Engineer

PlumChoice / Everon

2012 - 2014

- Supported small-business networks and endpoints for a managed services provider, including on-call troubleshooting.
- Built diagnostic tools for recurring issues and worked directly with business owners and users through recovery.

Infrastructure and Systems Focal

IBM

2010 - 2012

- Coordinated access, infrastructure changes and incident escalations across application, infrastructure and vendor teams.
- Managed virtualization test labs and built an internal backup tool that executives and staff adopted to reduce licensing costs.

Selected Projects

Network isolation for shared offices

Office Evolution · employment

2014 - 2015

- Built a provisioning system around a custom Linux router so individual Wi-Fi accounts landed on the right customer VLAN. Configured speed, bandwidth and access per office.
- Automated router and firewall setup with Node.js and gave the front desk a way to reset Wi-Fi credentials and troubleshoot without waiting on IT.

Check the restore, not just the backup

Technomancy IT · practice platform

- Wrote a recovery check that validates a database backup’s checksum, restores it into a disposable PostgreSQL instance and verifies table counts.
- Built public endpoint and container health checks into the release workflow to verify that the service was reachable after deployment.

Education

Front Range Community College

Computer Science coursework

2011 - 2013

Certifications and Training

CompTIA Network+ | CompTIA | Earned
